What are some important qualities
of a good school teacher? 10

In my point of view, firstly a good teacher must be patient and caring. Teacher shouldn't forget that some themes are very difficult. For example, if teacher will be patient and caring, you will know ~~sm~~ something better.

Moreover, a good teacher must be strict. If a student isn't doing his homework, this student must have punishment: one of my classmates wasn't doing his homework and teacher put him bad mark and now this boy is always ready for lessons. But on the other hand if teacher will be too strict, children won't like this lesson and won't listen to teacher. So teacher must understand when to be strict.

Besides teacher should be an interesting speaker. Some students hate long and boring lessons, so they just play on the lesson. In my opinion, it's very important to make children interested in the theme. For example, if lesson is boring for children, they won't understand it, if they won't understand it they won't pass their exam or get bad mark. And you can predict what can be next.

To conclude, I want to say that there are a lot of qualities for a good teacher, but I think the main is knowledge.
