### Writing

Subject: A new school canteen

Introduction. The aim of this report is to analyze the overall condition of a recently opened canteen for students. The report is based on the survey of my classmates, and it regards various aspects of the place that define the general quality of the canteen.

The size and atmosphere. The canteen is commonly described by students as comfortable and spacious, it is easily accessible for people with disabilities and little children. Designed in light-blue and yellow colours, and featured with environment-friendly furniture, it provides a hospitable atmosphere, which attracts students.

The food and the prices. As determined by the survey, most of the students regard prices as "expensive" and believe that "the food quality does not match the price of the food". It has been examined that more than 50 percent of surveyed have at some point bought cold food, sour milk, or stall bread. Despite that, the visitors are quite satisfied with the remarkable menu, which is a mixture of Russian, Chinese, French and Italian cuisine.

The cleanness. The research shows that the cleanness of the canteen leaves much to be desired. Even though the janitors usually clean the canteen every break, the place is usually referred to as dirty and untidy. The surveyed believe that it is one of the major problems of the place.

Writing

Suggestions and recommendations. To sum up, the overall condition of the canteen is satisfying. Many students like the atmosphere of the place, but the people believe that the quality of food should increase, the prices should lower, and the cleanness should be better preserved.
