Student's Report: Canteen.

The new, renovated canteen, opened at the end of last month has quickly overtaken the old one in popularity among the school's students. However with little to no clear feedback, evaluating their general impression of the facility has been difficult. ~~To so~~ This report aims to solve this issue by presenting a summary of reviews and suggestions made by those of my classmates who have attended the canteen.

First and foremost, there has been many positive remarks concerning the quality and range of foods offered at the canteen. The increase in variety obviously allows much more students to pick a ~~me~~ meal that suits their tastes. Another ~~asp~~ aspect noted as positive has been the greater number of tables, allowing for more students to be seated at the same time, promoting social interactions and improving the atmosphere.

Nevertheless, some of the canteen's customers have voiced their dissatisfaction with the facility's renovations, listing a number of issues they have experienced. According to them, adding more chairs and tables while the canteen's size remains unchanged has made it much more crowded. A substantial ~~amount~~ number of students have also expressed their dislike of the increase in prices, relative

to the old canteen, ~~seeing~~ seeing it as 'unfair'.

Having analyzed the complaints, I present a number of suggestions which I consider to provide a sufficient solution to the ~~the~~ issues presented.

Firstly, discounts should be offered to regular customers, this would increase attendance as well as satisfy the complaints about higher prices. Secondly, the number of tables and chairs should be scaled back to that of the old canteen, giving the students more space. This is especially relevant for health-related reasons, as a smaller amount of tables is easier to space out, facilitating Social Distancing. $9+3,5+1,5+1+2$
