Too Many Toys?

These days some parents buy their children a large number of toys to play with. A child, who has many toys, likes it. But some people say gr that it is bad to have a lot of them. So this is the problem we will talk about in the article. There are some advantages and disadvantages to have a large number of toys. gr

Parents can buy too many toys for their children. I think, in some ways it is good. A child can develop his own skills playing them. Puzzles and drawing help with it. Besides, children can realize their dreams with toys, such as LEGO or other things to build. Some of them can improve communication skills, like dolls. 118

From my point of view it is also bad to have a lot of toys. Children can forget about the real world during playing with them. They can grow up and ~~do not~~ ^{do not} know how to live or to communicate. I think some children can become angry because they can not choose one toy. For example, my brother has a large number of toys so he becomes angry and sad because he wants to play with gr all of them but he cannot.

In conclusion, I can say that ~~children~~ parents should ^{not} buy their children not many toys because it can be bad for them. But children must have toys to ~~develop~~ grow up a developed person. gr
