### Writing

Hi there! I'm vlada and today I would like to talk about fashion. It develops every day, and brands show us wonderful and sometimes strange designs. But have you ever wondered what clothes will look like in 100 years?

Firstly, I would say that clothes' design might be connected with the environment. Nowadays, many people are trying to save materials from its disappearance. In future the problem of saving the planet will be risen up and everybody will suggest their ideas to solve it, and this will change fashion. I can definitely say, that there won't be coats, that are made of animals.

Secondly, for my opinion, the clothes looking won't change much, because when now we have very comfortable pieces of it, and I don't think anyone can make it more comfortable for wearing. Maybe, some dresses will have an alien concept, as scientists learn more about space. I hope, people in future will be able to wear interesting-styled clothes, that's why we should develop our knowledge about style and fashion to give our future relatives opportunity to wear the best clothes of all centuries. Their clothes might be as comfortable as ours, but it will be more interesting to watch at look at, hilarious to laugh at and gorgeous to be proud of.
