Hello, I am Igor, ^{gr} student of an usual Russian school, and I want you to read an article about my ^{so} vision of ^{gr} 22nd Century Fashion.

I think the fashion will include more electronic equipment in itself, because now we live ^{so} in the postindustrial society, so then it may become metaindustrial, where gadgets ^{gr} would be used in all spheres of our life. So, ^P fashion should be able to be ^{lex} comfortable and ^{so} useful at the same time.

As a visual product I ^{so} see fashion in last years bring many ideas of ^{so} new fashion ^{which} are borrowed from old, I can even say, ^{so} ancient culture. So, what if 22nd Century Fashion would be ^{so} the same ^{gr} 21st Century Fashion, but from other angle of view? People there will interpret our everyday casual style as ^{so} something exotic or even luxury. Isn't it amazing?

In case ^{so} of worldwide problems, now ^{gr} is very popular "fast-fashion" products, where ^{so} your clothes live only from Monday to Sunday and then ^{so} becomes ^{gr} garbage; in my imagination ^{so} future fashion will correct all those problems of ecology and natural sources

wasting up to ⁸⁰ reuse of many clothes like recycling or growing the "second-hand ⁹⁰ culture".

In conclusion I would say that in my mind ¹⁰⁰ future fashion will grow up into ~~the~~ industry which products ¹⁰ are useful and needed for everyday life with ¹⁰ thought of saving our planet.
