Writing

What clothes will be in 100 years time?

Clothes are <sup>10</sup> important in our lives. We can't live without them. Every body wears clothes. We wear different types of clothes for <sup>10</sup> different times. By the way, nowadays we live in the world, when <sup>10</sup> everything changes fast. So, will the clothes change <sup>50</sup> in 100 years time?  
Well, everything in this world change <sup>60</sup> and clothes aren't an exception. For example, even 50 hundred years ago people didn't wear jeans and T-shirts as daily <sup>80</sup> clothes. They didn't really now what <sup>90</sup> this words mean. Moreover, fashion is the thing that always changes. If <sup>100</sup> never stops new trends and style list will appear and they will change <sup>110</sup> the fashion. By the way, nowadays we have a lot of environmental problems. If we <sup>120</sup> don't solve them, we will have a real disaster. That is the reason why all the <sup>130</sup> companies do everything they can to make their products environmentally clean. Companies, which produce clothes, are not an <sup>140</sup> exception. I believe that in the future we will be able to <sup>150</sup> buy sweaters, jeans, dresses, T-shirts and other types of clothes, that are made from recycled <sup>160</sup> products. Even now we are allowed to do that, but only in a few <sup>170</sup> stores. <sup>180</sup>

All in all, I am sure, that clothes in <sup>190</sup> the future will differ from ones we wear today. <sup>200</sup>
