Writing 168.

Books have always had a great impact on people's minds. Books have brought countless number of breathtaking stories to the world. Nowadays, not so many people read books and that is why it would be a good idea to make some of the books into films. I have recently read a book "Steve Jobs" by Walter Isaacson. I think this is a perfect story to make a film from.

The story is, unsurprisingly, about life of Steve Jobs who was the founder of Apple. It starts from the young ages of Steve. He was an adopted child and lived in a poor family. He didn't have passion to study things he didn't like and left the University after some years of education. After some time, Steve and his best friend made their first computer and started selling it. This computer became really popular and started bringing huge amounts of money. As the company was growing, Steve met with a lot of challenges. Because he wasn't good at dealing with people, he usually had a revenge on people that did bad things to him. That have changed our life completely. Unfortunately, Steve died from cancer in 2011. Nevertheless, he played a great role in the development of modern technologies.

In my opinion, this story should have a screen version as it proves that almost everyone is able to be successful. It shows us that determination is the main key to the success. It also won't be difficult to find a good cast for the film because the story is real and most of the people mentioned in the book are still alive. More than that, the book includes lots of plot twists what makes it really crucial and interesting to watch on the screen.

To sum up, Walter Isaacson's book "Steve Jobs" is worth making a screen version of it. It is based on a real story and full of interesting moments.
