Writing

Almost the centre

Have you ever been to Saint Petersburg? Even if you haven't, there is no way you've never heard of its gorgeous sights! The variety of architecture styles, breathtaking palaces and a lot of mystery stories... Have I got your interest? Do you want to visit Saint Petersburg now? Then I strongly recommend you to look for some apartments at Marata street.

I've tried a lot of places to stay in during my trips and this apartment is the best option I've ever had. Marata street is the best one you can choose because it's not so far from city's largest shopping street, the same goes for the city centre and surprisingly, there is not so many people walking by this street so you may sleep peacefully at night. If you don't want to sleep you can either look at the city's night lights or go and take a look at street performers. They're everywhere as soon as the sky goes dark.

Of course, there is some disadvantages too. Firstly, since the apartment is almost in the centre of the city, it will cost a lot to stay there. Secondly, there is no elevators in there because the buildings there are really old. But trust me, you will pay this price to see other tourists' shocked faces when you enter the building in the historical centre, ha!

$1+2+2+1+1 = 6$

PK3 $1+1+0+0+1+1 = 4$
