Writing

Ice Kingdom.

Have you ever thought about a place that is made of ice? Well, it is not only Antarctica. I would like to tell about a unique ice hotel in Sweden. I have been there for the first time last winter and that was the time of my life!

To start with, the hotel is located in a quite cold place, so the first thing you should remember, if you go there is to take warm clothes to the trip. More than that, this place is extremely popular among tourists, that is why think about booking the room at least a half year before.

As you arrive, the first thing you will be surprised about is the fact that every single object, including the building itself, is made of ice. It might sound strange, but even the bed in your room will be made of ice only. Don't be nervous! The administration provides tourists with warm blankets and other things to sleep in comfort.

Besides that, the temperatures in the building are not as low as you might expect, because they have used a special type of ice that doesn't melt at temperatures higher than 0°C. Despite that fact, there is a free sauna for the residents of the ice hotel, in case you get cold.

To sum up, if you would like to experience something you have never seen before, ice hotel in Sweden is worth visiting. The fact that there is nothing like this place anywhere in the world, made it one of my favourite places to visit. I enjoyed my time there and I hope you also will!
